

ZERO CLIENT PCIe HOST CARD

With the Teradici's PCoIP remote acceleration host card, users can achieve 100 percent color matching with lossless imaging over affordable IP networks in tandem with any of the Zero Client workstations. This is achieved through Teradici's innovations focused on pixel-level transmission.

Features

- The PCoIP host card can be added to any existing PC and is connected via Ethernet or Fiber IP network to Zero Client workstations.
- Ultra-secure and is independent of OS.
- Remote access for professional applications such 3D CAD/CAM, Digital Content Creation, video editing.
- Allows for dual 2560x1600 or quad 1920x1200 at 60fps over IP.
- Only 13W power consumption.
